DETAILED ACTION

Claim Rejections - 35 USC § 112

- 1. The following is a quotation of the second paragraph of 35 U.S.C. 112:
 - The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
- 2. Claims 42, 48, 50 and 53 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claims 42 and 48 recite the same limitation "a temperature sensor". Claims 50 and 53 recite the same limitation " a sugar accumulation sensor".

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 4. Claims 35-40, 42, 48, 49, 51, 54-57 are rejected under 35 U.S.C. 102(b) as being anticipated by Hall, III.

Hall, III discloses a vegetation dispensing device comprising: a conduit 190 with a channel 195 (see figure 14), an outlet 232 for conveying a substance 206a-c, a sensor 200 couple to the conduit 231 for sensing a growth condition, a flow control 205 for regulating an amount of substance, a microprocessor control system 10, the plurality of sensors such as soil moisture, ground temperature, ion concentration (as disclosed in column 15, lines 34-60).

Art Unit: 3752

Claim Rejections - 35 USC § 103

- 5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 6. Claims 41, 43-47, 50, 52, and 53 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hall, III.

Hall, III does not disclose expressly the sensors such as leaf wetness sensor, insect sensor, DNA sensor, sugar accumulation sensor, pheromone sensor or protein sensor etc. At the time the invention was made, it would have been an obvious matter of design choice to a person of ordinary skill in the art to provide the Hall, III device with the above sensors, because Applicant has not disclosed that the above sensors provides an advantage, or solves a stated problem. One of ordinary skill in the art, furthermore, would have expected Applicant's invention to perform equally well with any of the above sensors because they provide a way to monitor a condition of vegetation. Therefore, it would have been an obvious matter of design choice to modify the device of Hall, III to obtain the invention as specified in claims 41, 43-47, 50, 52, and 53. Furthermore, it is obvious to one skilled in the art to provide the Hall, III device with any type of sensors (see column 15, lines 43-45).

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The following patents are cited to show the art with respect to a material dispensing system to vegetation: Goldstein, and Lips.

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Dinh Q. Nguyen whose telephone number is 571-272-4907. The examiner can normally be reached on Monday-Thursday 6:00-4:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David Scherbel can be reached on 571-272-4919. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
